- JavaScript
- Python
- Dart(flutter)
- MERN stack
- Django
- Communication
- MySQL
- PostgreSQL
- MongoDb
- Problem Solving
- Metasploit
- Set
- Phishing

Certifications

- AWS cloud practioner
- Red Hat Certified Enterprise Application Developer

Objective

Aspiring and dedicated Computer Science student with hands-on experience in full-stack development, database integration, and user interface design. Seeking a web developer or software engineer role to apply my comprehensive skills, contribute to innovative solutions, and develop professionally within a forward-thinking company

Projects

Flutter App with Firebase Hosting and Firebase Storage (Simple Chat App)

- Developed a Flutter application hosted on Firebase, enabling user registration, login, group creation, and messaging functionality.
- Implemented Firebase Authentication for user authentication and Firebase Firestore for real-time database functionality.

MERN Stack Web-Based Mortgage and Pawn Brokerage System

- Implemented features such as user authentication, mortgage calculation, and pawn brokerage management
- Designed and implemented a responsive user interface for a seamless user experience across devices.

Django Web App Based On Real-Estate Management System

- Implemented backend with mysql and administration dashboard using tailwand css.
- Implemented features such as property listing, search functionality, user authentication, and appointment scheduling.

Java Swing-Based GUI Application on Bank Management System

- Utilized Java programming concepts to handle user input, process data, and display relevant information.
- Leveraged Java Swing components to create an intuitive and visually appealing user interface.

C Language-Based Mini Project on Movie Ticket Booking System

- Created a Movie Ticket Booking System using C, facilitating efficient management of seating records and available movies.
- Implemented data structures in C to store customer information, movie details, and ticket information.
